1 BE-GATE INTRODUCTION

BE-Gate is a service design for actors involved in e-commerce (Importers, Exporters, Transporters, Declarants) and express delivery. Data concerning goods or parcels can be send to Ministry of Finances via BE-Gate to allow risk analysis and selection of parcels.

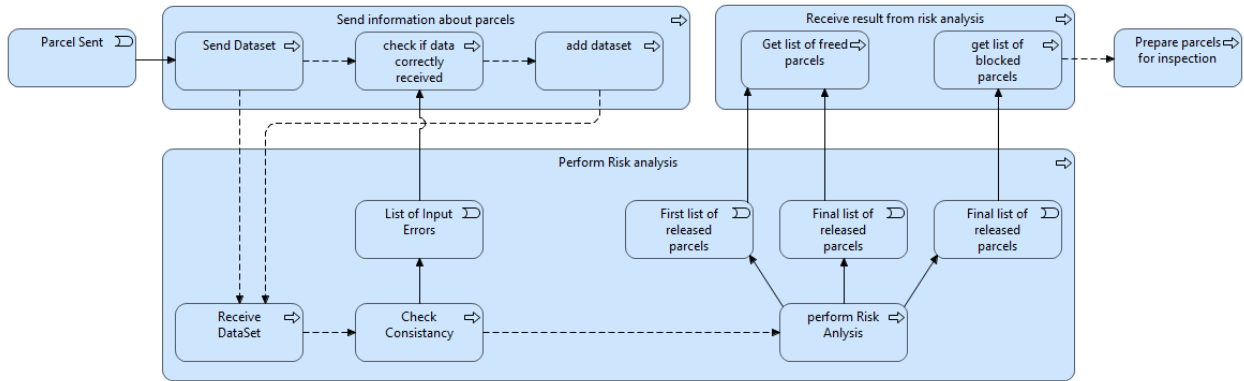

Figure 1 : BE-Gate Business Cooperation View

The BE-Gate Service is designed to accept datasets via SOAP. Datasets should be sent in CSV format

The document describes:

- SOAP Webservice connection and methods
- Datasets, CSV and XML

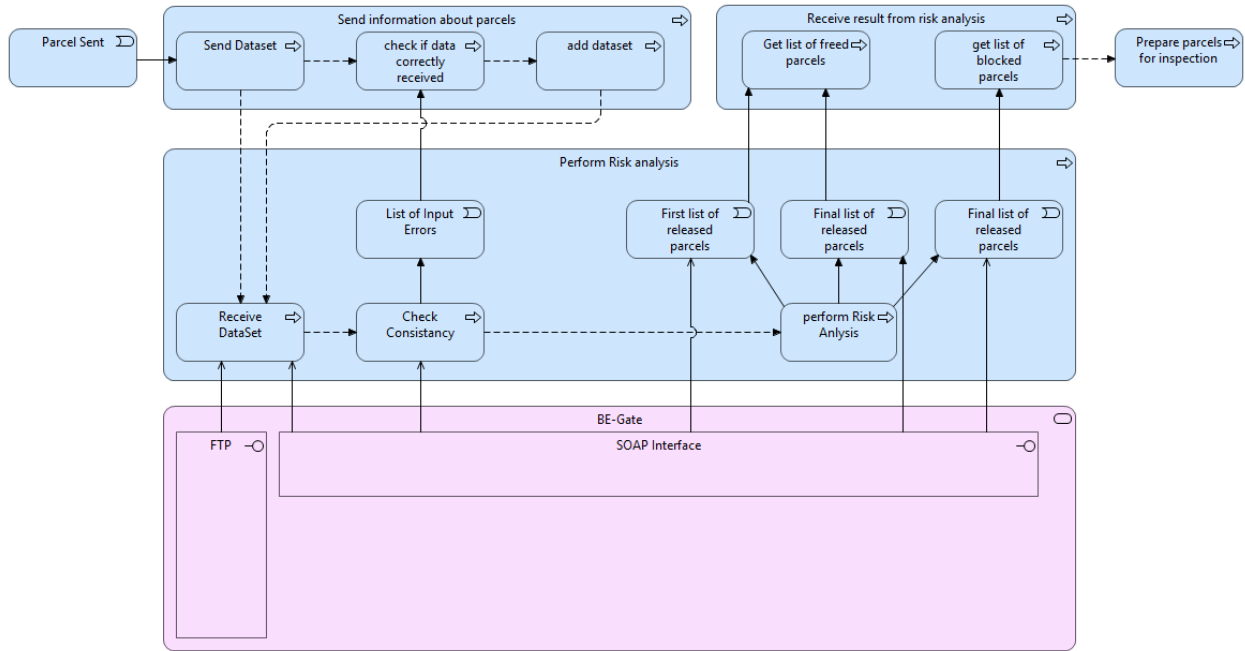

Figure 2 : BE-Gate Business - ICT Cooperation view

2 WEBSERVICE CONNECTION

The connection to webservices is allowed only if the Operator registered a certificate to ICT of ministry of finances.

2.1 CONNECTION TO WEBSERVICE: CERTIFICATES

Ministry of finances accepts certificate class 3 of those different issuers:

- CA Globalsign BE
- Quovadis BE
- Isabel BE

You must create 2 certificates, one for Acceptance and one other for production. The same certificate can't be use on Acceptance and production! The wildcard (*) certificate are not allowed in CN field. The name of the compay must be specified in the field CN.

NB: certificates can be 2 ways

2.2 WSDL AND SERVICE URI

The WSDL can be accessible only once the certificate is registered to ESB

2.2.1 WSDL example

```

2.2.2 BE-GATE: DEV Service

WSDL: <http://ljavad02:7981/begateApiClient/BeGateService?WSDL>

2.2.3 BE-GATE: Acceptance Service

WSDL: <http://ccffwbacc.finbel.intra/begateApiClient/BeGateService?WSDL>

2.2.4 BE-GATE: Production Service

WSDL: <https://ccff02.minfin.fgov.be/services/BeGateServiceExternal?WSDL>

2.3 SOAP SERVICE METHODS FOR OPERATORS

2.3.1 Introduction

Operators should use methods documented in the WSDL of BE-GATE – a SOAP type Webservice –, to send the required information. The information should be formatted in a CSV file for the first method. The other methods require XML formatted data:

- BeGateStartingPushTransporter - send data
- BeGateSendingPushTransporter - send data
- BeGateClosingPushTransporter - send data
- BeGateReceivingParcelBlocked - blocked parcels
- BeGateReceivingParcelFreed - freed parcels

To access those methods and service, Operator should register certificate class 3.

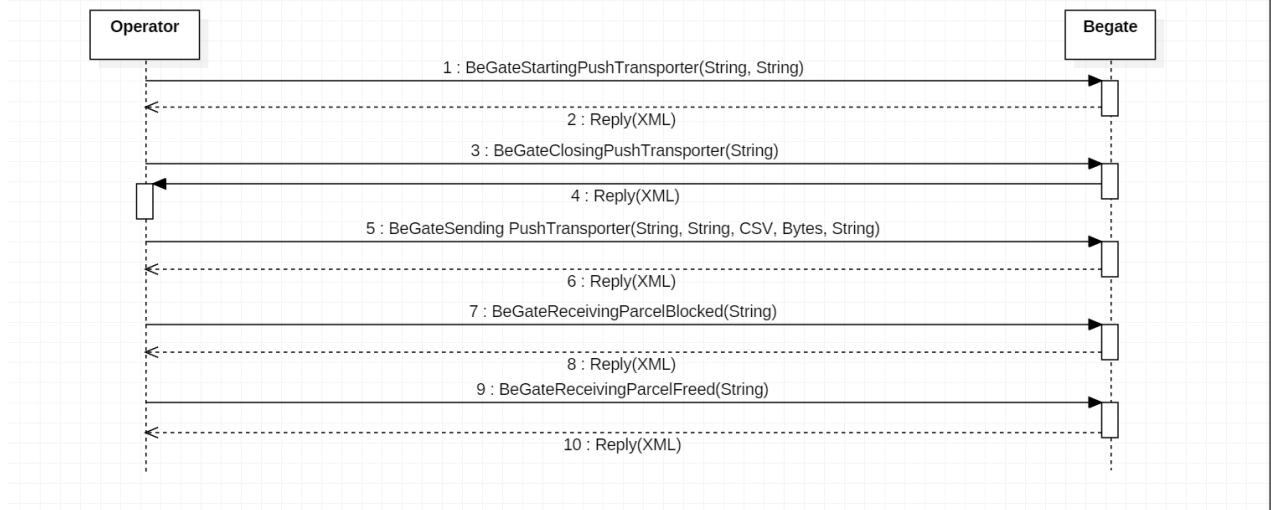

Figure 3: Sequence diagram of methods

2.3.2 Constraint using methods.

For customs every item in a parcel is seen as a “line” in the dataset. Operator can send all data in files of 3000 lines. Once all files are sent, a closing should be sent via a push notification.

The system checks line by line if the dataset is correct. In case of errors, only lines with errors should be resent, whether directly if the end of the push was not yet sent before, or where applicable in an addendum.

After 120 minutes the Operator can connect to get the first list of goods that are freed.

The final information about freed / blocked parcels can be obtain after a time depending of transaction nature

TRANSACTION	Waiting Time (minutes)
IMPORT – E-COMMERCE	240
EXPORT – E-COMMERCE	45
EXPRESS DELIVERY	120

Figure 4 : Table of Time to query the final blocked/freed list

2.3.3 Transporter Unique ID construction

The [*Transport ID*] is the unique identifier for the transport + the arrival date and time of the transport.

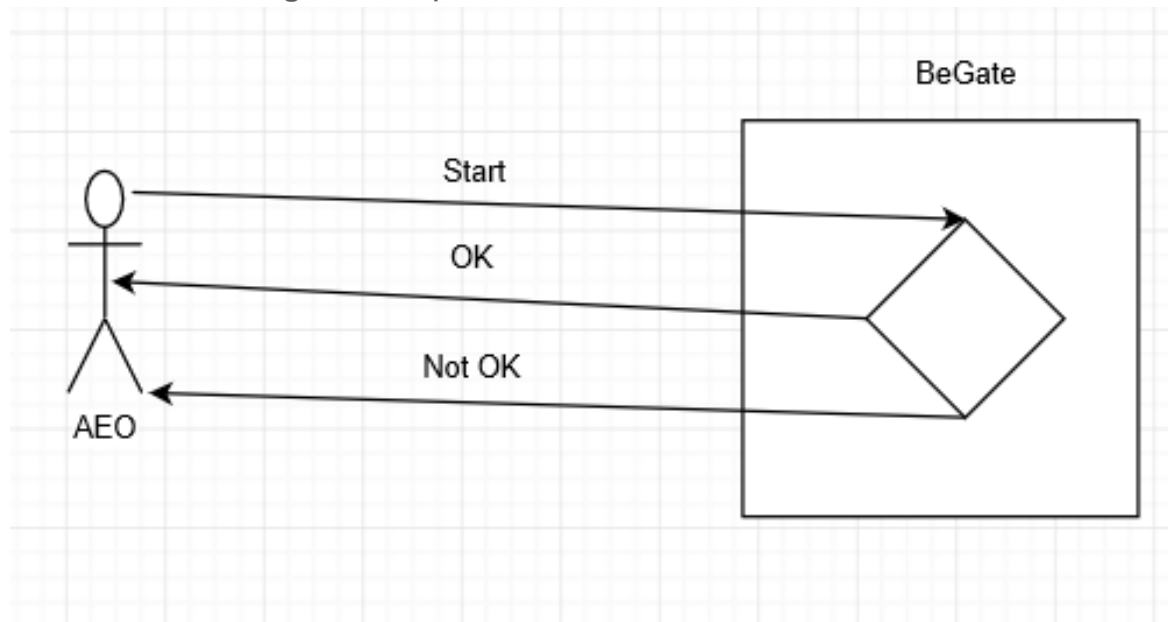

Example:

Unique identifier: DummyTransport123456789

Date and time arrival: 2019-02-04 12:30:00

Transport ID: DummyTransport123456789-2019-02-04 12:30:00

2.3.4 BeGateStartingPushTransporter

This is the first method to use before being able to effectively send CSV parcels to BEGATE.

EO will use this method, provided by the 'WSDL' of BEGATE, which will:

- Register one unique specific transporter in the database of BEGATE.
- Notify the start of the push of the information for this specific transporter to the server.

Then if the response is positive, EO can now use "BeGateSendingPushTransporter" to send the data for the regarded transporter. This specific method must be used only once for one specific transporter, at the beginning of the push.

Method NAME (WSDL)	BeGateStartingPushTransporter
PARAMETER 1	Type: java.lang.String Name: paramTransportIDString Description: The unique identification of the transporter. Encoding : UTF-8
PARAMETER 2	Type: java.lang.String Name: paramDateTimeString Description: The Arrival Time. Encoding : UTF-8
RETURN VALUE	Type : java.lang.String (XML)
USE CASE 1	If the return value is 'SUCCESSFUL', EO can now start pushing data (see : BeGateSendingPushTransporter).
USE CASE 2	If the return value is 'FAILED', the possible issues could be that this specific transporter is already registered in the database of BEGATE (and so the push of the information can already be executed) or a server issue.

Example:

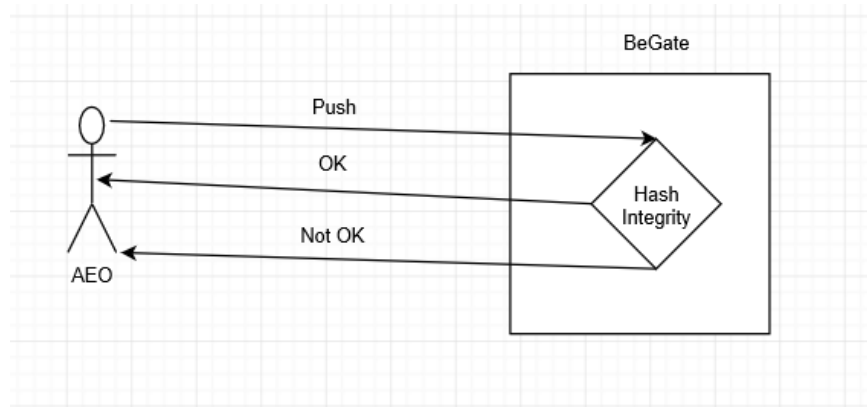

...

```
public static void main(String args[]) {
    BEGATEService BeGate = new BEGATEService();
    final BEGATE proxy = BeGate.getBEGATEPort();
    String result = proxy. BeGateStartingPushTransporter ("TRANSPORTER1X","2019-01-24
14:22:00");
    ...
}
```

Result:

```
<be.fgov.minfin.begate.apiclient.response.BeGateStartingPushTransporter>  
  <BeGateStartingPushTransporter ID="1">  
    <_idTransporter> TRANSPORTER1X </_idTransporter>  
    <_arrivalTime>2019-01-24 14:22:00</_arrivalTime>  
    <_statusRequest>SUCCESSFUL </_statusRequest>  
    <_additionalInformation> </_additionalInformation>  
    <_dateTime>26-11-2018 10:43:26</_dateTime>  
  </BeGateStartingPushTransporter>  
</be.fgov.minfin.begate.apiclient.response.BeGateStartingPushTransporter>
```

2.3.5 BeGateSendingPushTransporter

After only "BeGateStartingPushTransporter" has been used for one specific transporter, EO will use this method, provided by the 'WSDL' of BEGATE, to:

- Send the required data (push of the CSV parcels) for this transporter.
- Receive a confirmation message for each push.

The confirmation message is only based on the combination of the integrity from the received data and the hash received. If the indicator is Ok but an issue with the parcel will show up later, EO must use "BeGateReceivingParcelFailed" to get the error and re send the right information.

When "BeGateEndingPushTransporter" is used for one transporter, "BeGateSendingPushTransporter" cannot be used anymore for this transporter and "BeGateSendingAddendumTransporter" must be used instead for the same transporter.

This specific method can be used multiple times.

This method should be used prioritized than addendum which is only to send a forgotten parcel or a correction parcel!

Method NAME (WSDL)	BeGateSendingPushTransporter
PARAMETER 1	Type: java.lang.String Name: paramTransportIDString Description: The unique identification of the transporter ; based on the id of the transporter. Encoding : UTF-8
PARAMETER 2	Type: java.lang.String Name: paramId Parcel String Description: The unique identification of the Parcel sent. Each data pushed by this method (each CSV parcel) must be identified by an unique id. Encoding: UTF-8
PARAMETER 3	Type: java.lang.String Name: paramDataString Description: The data, from a csv format, whose each data of one line is concatenated by ";" and each line by "\n"

	Format : a;b;c;d;e\nf;g;h;i;j\nk;l;m;n;o Encoding : UTF-8
PARAMETER 4	Type: java.lang.Byte Specification: Byte Array. Name: paramHashByte Description: : The generated hash value of the data sent (from PARAMATER 3). Algorithm : SHA-1 Encoding : UTF-8
PARAMETER 5	Type: java.lang.String Name: paramIdDataSetString Description: The DataSet Code (See : 4.2.1. Data Set Code) Encoding: UTF-8
RETURN VALUE	java.lang.String (XML)
USE CASE 1	If the return value is 'SUCCESSFUL', EO can push more data with the same method or notify the end of the data, when it's over, with "BeGateEndingPushTransporter".
USE CASE 2	If the return value is 'FAILED', it could be that the integrity is not compliant and the message could be corrupted, with the error "Cannot verifying the Intrigity with Hash". EO must re send, with the same method ("BeGateSendingPushTransporter"), the same message (parcel) again until the confirmation is 'SUCCESSFUL'. It could also be a server issue. If "BeGateEndingPushTransporter" has been used although receiving one or multiple 'false" responses, "BeGateSendingAddendumTransporter" must be used instead.

Example

Document : BeGate_SPECIFICATIONS - 2.0.0.docx

Owner :Ministry of Finances

Status : Final

Subject : BE-Gate Webservice Specifications & Message Implementation Guide

Date : 07-06-19

Version : 2.0.0.

Page : 17/83

```

...
public static void main(String args[]) {
    BEGATEService BeGate = new BEGATEService();
    final BEGATE proxy = BeGate.getBEGATEPort();
    String result1 = proxy.BeGateStartingPushTransporter ("TRANSPORTER1X");
    ...
    String text = "data1; data2; data3;data4;data5;...\n; data1 data2; data3;data4;data5;...\n...";
    MessageDigest md;
    md = MessageDigest.getInstance("SHA-1");
    md.update(text.getBytes("UTF-8"));
    byte[] hash = md.digest();
    String result2 = proxy.BeGateSendingPushTransporter ("TRANSPORTER1X", "#0001.a", text,
hash, "A");
    ...
}

```

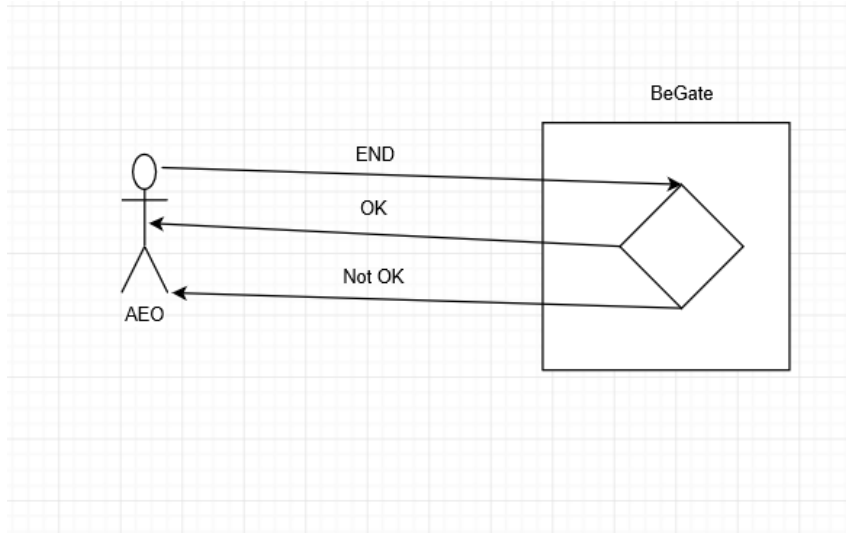

Result :

```

<be.fgov.minfin.begate.apiclient.response.BeGateSendingPushTransporter>
  <BeGateSendingPushTransporter ID="1">
    <_idTransporter>TRANSPORTER1X</_idTransporter>
    <_idParcel>#0001.a</_idParcel>
    <_statusRequest> SUCCESSFUL </_statusRequest>
    <_additionalInformation> </_additionalInformation>
    <_dateTime>26-11-2018 10:48:14</_dateTime>
  </BeGateSendingPushTransporter>
</be.fgov.minfin.begate.apiclient.response.BeGateSendingPushTransporter>

```

2.3.6 BeGateClosingPushTransporter

After only "BeGateStartingPushTransporter" has been used for one specific transporter and some information has been pushed with "BeGateSendingPushTransporter", EO will use this method, provided by the 'WSDL' of BEGATE, to:

- Notify to the BEGATE that all elements (all parcels) have been provided for the concerning specific transporter.

When this method is used, and the result is ok, all the 3 first methods as "BeGateStartingPushTransporter", "BeGateSendingPushTransporter", "BeGateClosingPushTransporter" cannot be used anymore for the specific transporter, and all other future parcels for this transporter, as additional information or rectification, must be sent as an addendum with "BeGateSendingAddendumTransporter".

This specific method must be used only once for one specific transporter, at the end of the push.

Method NAME (WSDL)

BeGateClosingPushTransporter

PARAMETER 1

Type: java.lang.String

Name: paramTransportIDString

Description: The unique identification of the transporter.

Encoding : UTF-8

Document : BeGate_SPECIFICATIONS - 2.0.0.docx

Date : 07-06-19

Owner :Ministry of Finances

Version : 2.0.0.

Status : Final

Subject : BE-Gate Webservice Specifications & Message Implementation Guide

Page : 19/83

RETURN VALUE

Type : java.lang.String (XML)

USE CASE 1

If the return value is equal to 'SUCCESSFUL', EO can simply restart the whole cycle for another specific transporter, or re-send the parcels failed (see "BeGateReceivingPushFailed) with "BeGateSendingAddendumTransporter" if it has some.

USE CASE 2

If the return value is equal to 'FAILED', The possible issues could be that this specific transporter has not been recorded yet in the database (see "BeGateStartPushTransporter") or a server issue.

Example

...

```
public static void main(String args[]) {
```

```
    BEGATEService BeGate = new BEGATEService();
```

```
    final BEGATE proxy = BeGate.getBEGATEPort();
```

```
    boolean result1 = proxy.BeGateStartingPushTransporter ("TRANSPORTER1X");
```

...

```
    String text = "data1 data2; data3;data4;data5;...\n; data1 data2; data3;data4;data5;...\n...";
```

```
    MessageDigest md;
```

```
    md = MessageDigest.getInstance("SHA-1");
```

```
    md.update(text.getBytes("UTF-8"));
```

```
    byte[] hash = md.digest();
```

```
    boolean result2 = proxy.BeGateSendingPushTransporter ("TRANSPORTER1X ", "#0001.a", text, hash);
```

...

Document : BeGate_SPECIFICATIONS - 2.0.0.docx

Owner :Ministry of Finances

Status : Final

Subject : BE-Gate Webservice Specifications & Message Implementation Guide

Date : 07-06-19

Version : 2.0.0.

Page : 20/83

```
        boolean result3 = proxy. BeGateClosingPushTransporter ("TRANSPORTER1X ");  
...  
}
```

Result :

```
<be.fgov.minfin.begate.apiclient.response. BeGateClosingPushTransporter >  
  < BeGateClosingPushTransporter PushTransporter ID="1">  
    <_idTransporter> TRANSPORTER1X </_idTransporter>  
    <_statusRequest> SUCCESSFUL </_statusRequest>

2.3.7 BeGateReceivingParcelBlocked

EO will use this method, provided by the 'WSDL' of BEGATE, to:

- Get all goods whose got blocked due risks...

Method NAME (WSDL)	BeGateReceivingParcelBlocked
PARAMETER 1	Type: java.lang.String Name: paramTransportIDString Description: The unique identification of the transporter. Encoding : UTF-8
RETURN VALUE	Type : java.lang.String (XML)
USE CASE 1	If the return value is 'Failed', something went wrong during the process. It could be a wrong transporter id or server issue.
USE CASE 2	If the return value is 'SUCCESSFUL', you could have no error with "NO PARCEL BLOCKED FOR [idTRANSPORTER] or some parcels blocked like Format : [idTransporter;TrackingNumber;uniqueIDNumber]\n Example : 00001-09091994-15:30;1;5 \n00001-

Example

...

```
public static void main(String args[]) {  
    BEGATEService BeGate = new BEGATEService();  
    final BEGATE proxy = BeGate.getBEGATEPort();  
    String result= proxy. BeGateReceivingParcelBlocked("TRANSPORTER1x");  
    ...  
}
```

Result:

```
<be.fgov.minfin.begate.apiclient.response.BeGateReceivingParcelBlocked>  
  < BeGateReceivingParcelBlocked ID="1">  
    <_idTransporter>hello</_idTransporter>  
    <_statusRequest>SUCCESSFUL</_statusRequest>
```

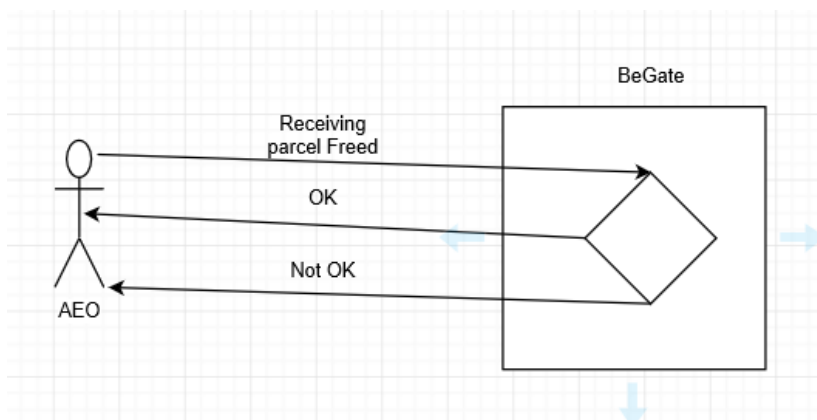

<_additionalInformation> NO PARCEL BLOCKED FOR [TRANSPORTER1x
]</_additionalInformation>

<_dateTime>01-02-2019 02:15:12</_dateTime>

</ BeGateReceivingParcelBlocked >

</be.gov.minfin.begate.apiclient.response. BeGateReceivingParcelBlocked >

2.3.8 BeGateReceivingParcelFreed

EO will use this method, provided by the 'WSDL' of BEGATE, to:
- Get all goods without risk...

Method NAME BeGateReceivingParcelFreed
(WSDL)

PARAMETER 1 Type: java.lang.String
Name: paramTransportIDString
Description: The unique identification of the transporter.
Encoding : UTF-8

RETURN Type : java.lang.String (XML)
VALUE

USE CASE 1 If the return value is 'Failed', something went wrong during the process. It could be a wrong transporter id or server issue.

USE CASE 2 If the return value is 'SUCCESSFUL', you could have no error with "NO PARCEL BLOCKED FOR [idTRANSPORTER] or some parcels blocked like
Format :
[idTransporter;TrackingNumber;uniqueIDNumber]\n
Example : 00001-09091994- 15:30;1;5 \n00001-09091994-15:30;2;3
Encoding : UTF-8

Example

...

```
public static void main(String args[]) {  
    BEGATEService BeGate = new BEGATEService();  
    final BEGATE proxy = BeGate.getBEGATEPort();
```

```

String result= proxy.
BeGateReceivingParcelFreed("TRANSPORTER1x");

...
}

```

Result:

```

<be.fgov.minfin.begate.apiclient.response.BeGateReceivingParcelFreed>
  < BeGateReceivingParcelFreed ID="1">
    <_idTransporter>hello</_idTransporter>
    <_statusRequest>SUCCESSFUL</_statusRequest>
    <_additionalInformation> NO PARCEL FREED FOR
[TRANSPORTER1x ]</_additionalInformation>
    <_dateTime>01-02-2019 02:15:12</_dateTime>
  </ BeGateReceivingParcelFreed >
</be.fgov.minfin.begate.apiclient.response.
BeGateReceivingParcelFreed >

```

2.4 SOAP SERVICE ERROR CODE

<i>Error Code Obtained</i>	<i>Signification of Error</i>
<i>BGT_TSP_0</i>	<i>Transport ID is Empty</i>
<i>BGT_TSP_1</i>	<i>Transport ID is exceeding the limit value</i>
<i>BGT_TSP_2</i>	<i>Transport ID is not existing</i>
<i>BGT_TSP_3</i>	<i>Transport ID is already existing</i>

<i>BGT_PLT_3</i>	<i>There was an error during the processing of error listing</i>
<i>BGT_PLT_4</i>	<i>There was an error during the execution of the statement</i>

3 DESCRIPTION OF DATASET

3.1 DATA SET POSSIBLE

For each Data set, every data must be present and in the strict order give by the tables below. To nullify a data, it should be an empty space (example: Data1;Data2;Data3;;Data4;...Data31\n...).

3.1.1 Data Set Code

Name	Code	Field number
Import Set	A	39
Export Set	B	36
Export Set High Value	C	32

3.1.2 Import Set (39 data) - A

<i>Column Name</i>	<i>Column Type</i>	<i>Column Length/SET</i>	<i>Null Allowed(Y/N)</i>
<i>DeclarationDate</i>	DATE	YYYY-MM-DD	N
<i>DeclarationType</i>	ENUM	'IM'	N
<i>AdditionalDeclarationType</i>	VARCHAR	1	N
<i>CustomsProcedure</i>	CHAR	4	N
<i>AdditionalProcedure</i>	CHAR	3	Y
<i>GoodsItemNumber</i>	VARCHAR	5	N

<i>CountryOriginCode</i>	CHAR	2	N
<i>ConsignorName</i>	VARCHAR	70	N
<i>ConsignorStreetAndNr</i>	VARCHAR	70	N
<i>ConsignorCity</i>	VARCHAR	35	N
<i>ConsignorPostcode</i>	VARCHAR	10	Y
<i>ConsignorCountry</i>	CHAR	2	N
<i>ConsigneeName</i>	VARCHAR	70	N
<i>ConsigneeStreetAndNr</i>	VARCHAR	70	N
<i>ConsigneePostcode</i>	VARCHAR	10	Y
<i>ConsigneeCity</i>	VARCHAR	35	N
<i>ConsigneeCountry</i>	CHAR	2	N
<i>ConsigneeID</i>	VARCHAR	17	N
<i>INCOTerm</i>	VARCHAR	3	N
<i>InvoiceCurrency</i>	CHAR	3	N
<i>ItemPrice_Amount</i>	DECIMAL	16,2	N
<i>UNLOcode</i>	VARCHAR	20	N

<i>NetMassKg</i>	DECIMAL	16,6	N
<i>GrossMassKg</i>	DECIMAL	16,6	N
<i>CommodityCodeCombinedNomenclatureCode</i>	VARCHAR	8	Y
<i>DescriptionGoods</i>	TEXT	512	N
<i>TypePackage</i>	VARCHAR	2	N
<i>NumberPackages</i>	VARCHAR	8	N
<i>LRN</i>	VARCHAR	22	N

<i>TrackingNumber</i>	VARCHAR	22	N
<i>UseAverageCustomsValue</i>	VARCHAR	1	Y
<i>ContainerIDNumber</i>	VARCHAR	17	Y
<i>SellerItemReference</i>	VARCHAR	50	Y
<i>InternetHyperTextLinkItem</i>	TEXT		Y
<i>EmailConsignee</i>	VARCHAR	120	Y
<i>IDMotherPackage</i>	VARCHAR	50	Y
<i>ConsigneeStatus</i>	VARCHAR	25	Y
<i>MethodPayment</i>	CHAR	1	Y
<i>PostalMarking</i>	TEXT		Y

3.1.3 Export Set (36 data) - B

<i>Column Name</i>	<i>Column Type</i>	<i>Column Length/SET</i>	<i>Null Allowed(Y/N)</i>
<i>DeclarationDate</i>	DATE	YYYY-MM-DD	N
<i>DeclarationType</i>	ENUM	CO,'EX','IM'	N

<i>AdditionalDeclarationType</i>	VARCHAR	1	N
<i>CustomsProcedure</i>	CHAR	4	N
<i>GoodsItemNumber</i>	VARCHAR	5	N
<i>CountryOriginCode</i>	CHAR	2	N

<i>ShippingMarks</i>	TEXT		N
<i>CommodityCodeCombinedNomenclatureCode</i>	VARCHAR	8	Y
<i>NetMassKg</i>	DECIMAL	16,6	N
<i>TypePackage</i>	VARCHAR	2	N
<i>NumberPackages</i>	VARCHAR	8	N
<i>ItemPrice_Amount</i>	DECIMAL	16,2	N

<i>DocsProducedCertsAuthorisationsAddRef</i>	VARCHAR	39	N
<i>Signature_Authentication</i>	VARCHAR	35	N

3.2 CSV FORMAT

The CSV format should be an UTF-8 .

One CSV should contains only one possible dataset.

Each CSV can only contains 5000 lines.

Each line is separated by a '\n' (return carriage).

Each data is separated by a ';' (semicolon).

Example :

Data1;Data2;Data3;...;Data167;\nData1;Data2;Data3;...Data167;\n ...

3.3 XML FORMAT

- The XML format used is UTF-8 .
- One XML must contains only one possible dataset.
- The XML format must follow the appropriate dataset schema.
- There are 7 schemas. Each schema maps one dataset sort.
- The schemas are given in appendix. XML examples are also given.
- To refer to the specific schema, you must define in the header of the xml two fields for the DataSet tag: type and noNamespaceSchemaLocation. The type must match the schema.

Possible values are thus :

Type	noNamespaceSchemaLocation
A	begate_schema_A.xsd
B	begate_schema_B.xsd
C	begate_schema_C.xsd
D	begate_schema_D.xsd
E	begate_schema_D.xsd

Example with a dataset D :

Document : BeGate_SPECIFICATIONS - 2.0.0.docx

Owner :Ministry of Finances

Status : Final

Subject : BE-Gate Webservice Specifications & Message Implementation Guide

Date : 07-06-19

Version : 2.0.0.

Page : 37/83

```
<DataSet type="D"
xs:noNamespaceSchemaLocation="begate_schema_D.xsd"
xmlns:xs="http://www.w3.org/2001/XMLSchema-instance">
```

3.4 DATA CONSTRUCTION

3.4.1 Declaration type

CO

- Union goods to specific measures during the transitional period following the accession of new Member States
- Placing of Union goods under the customs warehousing procedure referred to in column B3 of the data requirements table in Title I of Annex B to Delegated Regulation (EU) 2015/2446 in order to obtain payment of special export refunds prior to exportation or manufacturing under customs supervision and under customs control prior to exportation and payment of export refunds.
- Union goods in the context of trade between parts of the customs territory of the Union to which the provisions of Council Directive 2006/112/EC (1) or Council Directive 2008/118/EC (2) are applicable and parts of that territory to which those provisions do not apply, or in the context of trade between parts of that territory where those provisions do not apply as referred to in columns B4 and H5 of the data requirements table in Title I of Annex B to Delegated Regulation (EU) 2015/2446.

(1) Council Directive 2006/112/EC of 28 November 2006 on the common system of value added tax (OJ L 347, 11.12.2006, p. 1).

(2) Council Directive 2008/118/EC of 16 December 2008 concerning the general arrangements for excise duty and repealing Directive 92/12/EEC (OJ L 9, 14.1.2009, p. 12).

EX

- For trade with countries and territories situated outside of the customs territory of the Union.

For placing goods under a customs procedure referred to in columns B1, B2

and C1 and for re-export referred to in column B1 of the data requirements table in Title I of Annex B to Delegated Regulation (EU) 2015/2446.

IM

- For trade with countries and territories situated outside of the customs territory of the Union.

For placing goods under a customs procedure referred to in columns H1 to H4, H6 and I1 of the data requirements table in Title I of Annex B to Delegated Regulation (EU) 2015/2446.

For placing non-Union goods under a customs procedure in the context of trade between Member States.

3.4.2 Additional declaration type

A

For a standard customs declaration (under Article 162 of the Code)

B

For a simplified declaration on occasional basis (under Article 166(1) of the Code)

C

For a simplified customs declaration with regular use (under Article 166(2) of the Code)

D

For lodging a standard customs declaration (such as referred to under code A) in accordance with Article of the Code.

E

For lodging a simplified declaration (such as referred to under code B) in accordance with Article 171 of the Code.

F

For lodging a simplified declaration (such as referred to under code C) in accordance with Article 171 of the Code.

X

For a supplementary declaration of simplified declarations covered by B and E

Y

For a supplementary declaration of simplified declarations covered by C and F

Z

For a supplementary declaration under the procedure covered under Article 182 of the Code

3.4.3 Goods item number

Enter the order number of the item concerned in the total number of items.

3.4.4 Signature/authentication

3.4.5 Total number of items

The total number of items declared in the declaration or summary declaration.

3.4.6 Procedure

The codes to be entered in this subdivision are four-digit codes, composed of a two-digit code representing the procedure requested, followed by a second two-digit code representing the previous procedure. The list of two-digit codes is given below.

‘Previous procedure’ means the procedure under which the goods were placed before being placed under the procedure requested.

It should be noted that where the previous procedure is customs warehousing or temporary admission, or where the goods have come from a free zone, the relevant code should be used only where the goods have not been placed under inward or outward processing or end-use.

For example: re-export of goods imported under inward processing and subsequently placed under customs warehousing = 3151 (not 3171). (First operation = 5100; second operation = 7151; third operation re-export = 3151).

Similarly, where goods previously temporarily exported are re-imported and released for free circulation after having been placed under customs warehousing, temporary

admission or in a free zone this is regarded as simple re-importation after temporary export.

For example: entry for home use with simultaneous entry for free circulation of goods exported under outward processing and placed under customs warehousing upon re-importation = 6121 (not 6171). (First operation: temporary export under outward processing = 2100; second operation: storage in a customs warehouse = 7121; third operation: entry for home use + entry for free circulation = 6121).

The codes marked in the list below with the letter (a) cannot be used as the first two digits of the procedure code, but only to indicate the previous procedure.

For example: 4054 = entry for free circulation and home use of goods previously placed under inward processing in another Member State.

00

This code is used to indicate that there is no previous procedure (a)

01

Release for free circulation of goods simultaneously redispached in the context of trade between parts of the customs territory of the Union in which the provisions of Directive 2006/112/EC or Directive 2008/118/EC are applicable and parts of that territory in which these provisions do not apply, or in the context of trade between the parts of that territory where these provisions do not apply.

Release for Free circulation of goods simultaneously redispached in the context of trade between the European Union and the countries with which it has formed a customs union (goods that fall under a Customs Union Agreement).

Examples:

Non-Union goods arriving from a third country, released for free circulation in France and sent on to the Channel Islands.

Non-Union goods arriving from a third country, released for free circulation in Spain and sent on to Andorra.

07

Release of goods for free circulation simultaneously placed under a warehousing procedure other than a customs warehousing procedure where neither VAT nor, when applicable, excise duties have been paid.

Explanation:

This code is to be used where the goods are released for free circulation but where VAT and excise duties have not been paid.

Examples:

Imported raw sugar is released for free circulation but VAT has not been paid. While the goods are placed in a warehouse or approved area other than customs warehouse, payment of the VAT is suspended.

Imported mineral oils are released for free circulation and no VAT has been paid. While the goods are stored in a tax warehouse, payment of VAT and excise duties is suspended.

10

Permanent export.

Example:

Normal export of Union goods to a third country, but also dispatch of Union goods to parts of the customs territory of the Union to which the provisions of Council Directive 2006/112/EC or Directive 2008/118/EC do not apply.

11

Export of processed products obtained from equivalent goods under inward processing before placing non-Union goods under inward processing.

Explanation: Prior export (EX-IM) in accordance with Art. 223(2)c) of the Code.

Example:

Export of cigarettes manufactured from Union tobacco leaves before placing of non-Union tobacco leaves under inward processing.

21

Temporary export under the outward processing procedure, if not covered by code 22.

Example

Outward processing procedure under Articles 259 to 262 of the Code.

The simultaneous application to textile products of the outward processing procedure and the economic outward processing procedure (Council Regulation (EC) No 3036/94) (1) is not covered by this code.

(1) Council Regulation (EC) No 3036/94 of 8 December 1994 establishing economic outward processing arrangements applicable to certain textiles and clothing products reimported into the Community after working or processing in certain third countries (OJ L 322, 15.12.1994, p. 1).

22

Temporary export other than that referred to under code 21 and 23.

This code covers the following situations:

- The simultaneous application to textile products of the outward processing procedure and the economic outward processing procedure (Council Regulation (EC) No 3036/94)
- Temporary export of goods from the Union for repair, processing, adaptation, making up or re-working where no customs duties will be due at re-importation.

23

Temporary export for return in the unaltered state.

Example:

Temporary export for exhibitions of articles such as samples, professional equipment, etc.

31

Re-export.

Explanation:

Re-export of non-Union goods following a special procedure.

Example:

Goods are placed under customs warehousing and subsequently declared for re-export.

40

Simultaneous release for free circulation and home use of goods.

Entry for home use of goods in the context of trade between the Union and the countries with which it has formed a customs union.

Entry for home use of goods in the context of trade referred to in Article 1(3) of the code.

Examples:

- Goods coming from Japan with payment of customs duty, VAT and when applicable excise duties.
- Goods coming from Andorra and entered for home use in Germany
- Goods arriving from Martinique and entered for home use in Belgium.

42

Simultaneous release for free circulation and home use of goods which are the subject of a VAT-exempt supply to another Member State and, when applicable, an excise-duty suspension.

Entry for home use of Union goods, in the context of trade between parts of the customs territory of the Union in which the provisions of Directive 2006/112/EC and Directive 2008/118/EC are not applicable and parts of that territory in which those provisions are applicable, which are the subject of a VAT-exempt supply to another Member State and, when applicable, an excise duty suspension.

Explanation:

Exemption from payment of VAT and, where applicable, the excise duty suspension, is granted because the import is followed by intra-Union supply or transfer of the goods to another Member State. In that case the VAT and,

where applicable, the excise duty will be due in the Member State of final destination. In order to use this procedure, the persons must meet other conditions listed in Article 143(2) of Directive 2006/112/EC and, where applicable, the conditions listed in Article 17(1)(b) of Directive 2008/118/EC. The information required by Article 143 (2) of Directive 2006/112/EC shall be entered in D.E. 3/40 Additional fiscal references identification n°.

Examples:

Non-Union goods are released for free circulation in one Member State and are the subject of a VAT-exempt supply to another Member State. The VAT formalities are dealt with by a customs agent who is a tax representative using the intra-Union VAT system.

Non-Union goods subject to excise duties imported from a third country, which are released for free circulation and are the subject of a VAT-exempt supply to another Member State. The release for free circulation is immediately followed by a movement under excise duty suspension from the place of importation initiated by a registered consignor in accordance with Article 17(1)(b) of Directive 2008/118/EC.

43

Simultaneous release for free circulation and home use of goods subject to specific measures connected with the collection of an amount during the transitional period following the accession of new Member States.

Example:

Release for free circulation of agricultural products subject, during a special transitional period following the accession of new Member States, to a special customs procedure or special measures between the new Member States and the rest of the Union.

44

End-use

Release for free circulation and home use under a duty exemption or at a reduced rate of duty on account of their specific use.

Example: Release for free circulation of non-Union engines for integration into a civil aircraft built in the European Union.

Non-union goods for integration in certain categories of ships, boats and other vessels and for drilling or production platforms

45

Release of goods for free circulation and partial entry for home use for either VAT or excise duties and their placing in a warehouse other than customs warehouses. .

Explanation:

This code is to be used for goods which are subjected to both VAT and excise duties and where only one of these categories of taxes are paid when the goods are released for free circulation..

Examples:

Non-Union cigarettes are released for free circulation and VAT has been paid. While the goods are in the tax warehouse, the payment of excise duties is suspended.

Excise goods imported from a third country or from a third territory referred to in Article 5(3) of Directive 2008/118/EC are released for free circulation. The release for free circulation is immediately followed by a movement under excise duty suspension initiated by a registered consignor at the place of importation, in accordance with Article 17(1)(b) of Directive 2008/118/EC, to a tax warehouse in the same Member State.

46

Import of processed products obtained from equivalent goods under the outward- processing procedure before exportation of goods they are replacing.

Explanation:

Prior import in accordance with Article 223(2)d) of the Code.

Example:

Import of tables manufactured from non-Union wood before placing Union wood under outward processing.

48

Entry for home use with simultaneous release for free circulation of replacement products under outward processing prior to the export of the defective goods.

Explanation: Standard exchange system (IM-EX), prior importation in accordance with Article 262(1) of the Code.

51

Placing goods under inward processing procedure.

Explanation:
Inward processing in accordance with Article 256 of the Code.

53

Placing of goods under temporary admission.

Explanation:
Placing of non-Union goods intended for re-export under the temporary admission procedure.

May be used in the customs territory of the Union, with total or partial relief from import duties in accordance with article 250 of the Code.

Example:
Temporary admission, e.g. for an exhibition.

54

Inward processing in another Member State (without their being released for free circulation in that Member State) (a).

Explanation:
This code is used to record the operation for the purposes of statistics on intra-Union trade.

Example:
Non-Union goods are placed under inward processing in Belgium (5100).

After undergoing inward processing, they are dispatched to Germany for release for free circulation (4054) or further processing (5154).

61

Re-importation with simultaneous release for free circulation and home use of goods.

Explanation:

Goods re-imported from a third country with payment of the customs duties and VAT.

63

Re-importation with simultaneous release for free circulation and home use of goods which are the subject of a VAT-exempt supply to another Member State and, when applicable, an excise duty suspension.

Explanation:

Exemption from payment of VAT and, where applicable, the excise duty suspension, is granted because that the reimportation is followed by intra-Union supply or transfer of the goods to another Member State. In such a case the VAT and, where applicable, the excise duty, will be due in the Member State of final destination. In order to use this procedure, the persons must meet other conditions listed in Article 143(2) of Directive 2006/112/EC and, where applicable, the conditions listed in Article 17(1)(b) of Directive 2008/118/EC. The information required by Article 143 (2) of Directive 2006/112/EC shall be entered in D.E. 3/40 Additional fiscal references identification n°.

Examples:

Reimportation after outward processing or temporary export, with any VAT debt being charged to a tax representative.

Excise goods reimported after outward processing and released for free circulation, which are the subject of a VAT-exempt supply to another Member State. The release for free circulation is immediately followed by a movement under excise duty suspension from the place of reimportation initiated by a registered consignor in accordance with Article 17(1)(b) of Directive 2008/118/EC.

68

Re-importation with partial entry for home use and simultaneous release for free circulation and placing of goods under warehousing other than customs warehousing procedure.

Example:

Processed alcoholic beverages are re-imported and placed in a tax warehouse.

Explanation: This code is to be used for goods which are subject to both VAT and excise duties and where only one of those categories of taxes is paid when the goods are released for free circulation

71

Placing of goods under the customs warehousing procedure.

Explanation:

Placing of goods under the customs warehousing procedure.

76

Placing of Union goods under the customs warehousing procedure in accordance with Article 237(2) of the Code.

Explanation:

Boned meat of adult male bovine animals placed under customs warehousing prior to export (Article 4 of Commission Regulation (EC) No 1741/2006 (1) of 24 November 2006 laying down the conditions for granting the special export refund on boned meat of adult male bovine animals placed under the customs warehousing procedure prior to export). (1)Commission Regulation (EC) No 1741/2006 of 24 November 2006 laying down the conditions for granting the special export refund on boned meat of adult male bovine animals placed under the customs warehousing procedure prior to export (OJ L 329, 25.11.2006, p. 7).

Following the release for free circulation, application for repayment or remission of import duty based on the goods being defective or not complying with the terms of the contract (Art.118 of the Code).

In accordance with Article 118 (4) of the Code the goods in question may be placed under the customs warehousing procedure instead of having to be taken out of the customs territory of Union in order for the repayment or remission to be granted.

77

Manufacturing of Union goods under customs supervision by the customs authorities and under customs control (within the meaning of Art. 5(27) and (3) of Code) prior to exportation and payment of export refunds.

Explanation:

Preserved beef and veal products manufactured under supervision by the customs authorities and under customs control prior to export (Articles 2 and 3 of Commission Regulation (EC) No 1731/2006 of 23 November 2006 on special detailed rules for the application of export refunds in the case of certain preserved beef and veal products)

78

Placing of goods under free-zone. (a)

95

Placing of Union Goods under a warehousing procedure other than a customs warehousing procedure where neither VAT nor, when applicable, excise duties have been paid.

Explanation:

This code is to be used in the context of trade referred to in Article 1 (3) of the Code as well as trade between the Union and the countries with which it has formed a customs union and where neither VAT nor excise duties have been paid.

Example:

Cigarettes from the Canary Islands are brought to Belgium and stored in a tax warehouse; payment of VAT and excise duties is suspended.

96

Placing of Union Goods under a warehousing procedure other than a customs warehousing procedure where either VAT or, when applicable, excise duties have been paid and the payment of the other tax is suspended.

Explanation: This code is to be used in the context of trade referred to in Article 1 (3) of the Code as well as trade between the Union and the countries with which it has formed a customs union and where either VAT or excise duties have been paid and the payment of the other tax is suspended.

Example: Cigarettes from the Canary Islands are brought to France and stored in a tax warehouse; VAT has been paid and the payment of excise duties is suspended.

3.4.8 LRN

The local reference number (LRN) shall be used. It is nationally defined and allocated by the declarant in agreement with the competent authorities to identify each single declaration.

3.4.9 Consignor

Person who lodges the export declaration or on whose behalf it is lodged and who is the owner of the goods or who has a similar right of disposal over the goods at the time when the declaration is

accepted. Enter the EORI number referred to in Article 1(18) of Delegated Regulation (EU) 2015/2446. Where the consignor/exporter does not have an EORI number, the customs authorities may assign him an ad hoc number for the declaration concerned.

3.4.16 Invoice currency

Specify the currency of the invoice

3.4.17 Item price/amount

State the price of the item in question in the currency indicated

3.4.18 Declaration date

YYYY-MM-DD

3.4.19 Country of destination code

Using the appropriate Union code (alpha-2 country codes), enter the last country of destination to which the goods are to be exported, if known at the time of export.

3.4.20 Country of origin code

Where neither a commercial transaction (e.g. sale or processing) nor a delay not related to the movement of goods has taken place in an intermediate country, enter in box 15a the relevant Union code of Appendix D1 for the country from which the goods were initially dispatched to the Member State in which the goods are located at the time of their release for the customs procedure.

Indicate the last intermediate country where such a delay or a commercial transaction has taken place.

3.4.21 UNLOCODE

The precise location of the goods to be examined

3.4.22 Net mass (kg)

Enter the net mass, expressed in kilograms, of the goods described. The net mass is the mass of the goods without any packaging.

3.4.23 Gross mass (kg)

Enter the gross mass, expressed in kilograms, of the goods described. The gross mass is the aggregate mass of the goods and their packaging, excluding containers and other transport aids.

3.4.24 Description of goods

The description of the goods shall be taken to mean the normal trade description. It must be sufficiently clear to enable the goods to be identified and classified immediately and unambiguously. The description must be written in NL, FR, DE or ENG.

3.4.25 Type of packages

The following codes shall be used.

UN/ECE Recommendation No 21/Rev. 9 of 2012.

3.4.26 Number of packages

Total number of packages based on the smallest external packing unit. This is the number of individual items packaged in such a way that they cannot be divided without first undoing the packing, or the number of pieces, if unpackaged.

3.4.27 Shipping marks

Free description of marks and numbers on transport units or packages.

3.4.28 Commodity code – Combined Nomenclature code

Please state the code number of the item in question - mandatory for all items with a value of more than € 22 for import.

Please state the code number of the item in question for export.

3.4.29 Container identification number

3.4.30 UseAverageCustomsValue

Check this box (X) if the customs value is determined according to reasonable means (use of average customs values by certified operators and updated every 3 months). TrackingNumber

This field is the unique key to the customs declaration (for the IT treatment of the declaration) and allows you to easily check the goods during the control process.
